

PERSONAL NOTES

Arrivals and Departures of Residents and Visitors

IN THE SOCIAL WORLD

The Column Everybody Reads—Chat About Your Friends and Neighbors—Here and There.

Huntingdon W. Va. was visited by a \$400,000 fire Sunday.

J. D. Mason, of Hyndman transacted business in Bedford yesterday.

W. A. Butts and Rev. Wertz both of Loysburg were in Bedford Monday on business.

O. R. W. Dively, of Bedford Rt. 1, was transacting business in Bedford last Saturday.

G. M. Williams, of Bedford Rt. 2, transacted business in Bedford last Saturday.

B. F. Madore and family left on Tuesday to visit relatives and friends in Uniontown.

Messrs Burton Leader and Roy Sill who spent some time in service in France returned home last week.

Donie Alton Leply, of Cumberland and Cora F. Smith of Piney Creek, Pa., received a marriage license in Cumberland this week.

Jacob G. Holler and Evelyn Burkett of Buffalo Mills, Pa. obtained a marriage license in Cumberland Wednesday.

Misses Helen Line and Bertha Smith of this place are spending this week in Cumberland visiting the latter's sister, Mrs. R. B. Suter.

Regina Mattingly of Cumberland and Bernadette Mattingly of this place, are spending their vacation at Atlantic City.

Bedford Handle Factory received a carload of fine hickory from Arkansas this week. They consume about a car load a week.

Johnstown Y. M. C. A. are camping on the Sam Stuckey farm near Napier. Some of the leaders are Scott, Fee and Dave Speck.

Mr. and Mrs. George Beegle and Mr. and Mrs. Grant Diehl, of the Cove, spent Saturday night and Sunday in Cumberland last week.

Mrs. W. S. Suter, of Wolfsville 1 and daughters Helen and Vera spent a short time in Bedford on Thursday and were callers at this office.

Miss Mary May, is a patient in the Nason Hospital at Roanoke Springs, suffering with an attack of appendicitis.

Mr. and Mrs. Ambrose Lehman of Altoona, are visiting friends in Bedford this week. They expect to visit in Westernport, Md. before returning to their home.

Miss Helen McLaughlin returned to her home on Sunday having recently undergone an operation in the Western Maryland Hospital, Cumberland, and is much improved.

Mrs. Ira Reese, of Philadelphia, and Mrs. Jerome Foreman, of Warren Ohio, and Mrs. Frank T. Kalaf, of Washington, D. C. are visiting at the home of Mr. and Mrs. J. C. Bortz.

Mrs. Ayres, who has been Supervisor at the Zion Hospital, Brooklyn N. Y. has resigned her position and is awaiting the arrival of Captain Ayres who will arrive on the Northern Pacific liner, Friday July 18th.

Annie C. Koontz of Charlesville, and cousin Miss Ada Hunt of Bedford left last Friday for an extended western tour. While gone they expect to visit friends in Iowa, Nebraska, Kansas City Missouri and Wisconsin.

Jasper Luman, of Hyndman, was in Bedford on Wednesday. Mr. Luman is one of our staunch Democrats of the South western part of the county, and is contemplating being a candidate for Register and Recorder of Bedford County.

Revenue Collector J. H. O'Rourke will be in his office in the Building occupied by W. S. Reed & Co. Bedford, Pa. on Mondays, Wednesdays, and Saturdays until further notice. The balance of the week he will visit different sections of the county. On Friday the 18th he will be in Everett, Pa.

John E. Satterfield of Six Mile Run, recently celebrated his 94th birthday. He is enjoying good health and has retained all his faculties to a remarkable degree. He is the father of fourteen children the two youngest having recently returned from service with the U. S. Army. During the Civil War Mr. Satterfield served with the 20th Pennsylvania Infantry.

The new automobile License Law which goes into effect January 1, 1920 makes the fee for passenger cars 40 cents per horse power with a minimum fee of \$10.00. Trucks, weighing less than 2000 lbs. are charged according to horse power, those less than 3000 lbs. \$20.00 less than 4500 lbs. \$25.00, less than 6000 lbs. \$30.00, less than 7000 lbs. \$50.00 less than 8000 lbs. \$75.00, less than 10,000 lbs. \$100.00 and 10,000 lbs or over \$150.00. You have to have good sight and hearing to obtain a license and must not be deformed sufficient to interfere with operating the machine. The speed limit is 30 miles per hour. All automobiles must display a light whether standing or moving after dark. Its a fine of \$100.00 to \$500.00 and imprisonment for 1 year for violating the provisions of the act.

Red Cross Notes

Mrs. Howard Cheyney, Vice Director of the Pennsylvania-Delaware Division of the A. R. C. Canteen Service visited Bedford last week to confer with the officers of the Bedford Canteen Station, in regard to the future work of the canteen. Army circles feel that it would be unwise for an organization, of such value as the canteen has demonstrated itself to be, to be allowed to fall apart, and it was decided to place the Bedford canteen workers on a reserve list to be called upon as needed, the individual members to decide for themselves as to this, reserve membership.

The Executive Board will remain in active service as long as there is need for the canteen. The canteen is always ready for the use of all soldiers and sailors, and is in use every week by from three to twenty and sometimes more soldiers. The officers with the Transcontinental Motor Truck Company expressed great pleasure for the comforts given the men at the canteen on the 9th of July when the trucks were in Bedford.

Owing to the large amount of necessary work to be done by the Red Cross, at the request of the U. S. Government, our work rooms will not be closed this summer. The rooms are very cool and comfortable and are open for work two days and one evening each week, and often other days for extra work. A large box of yarn is on hand for refugee work.

There was no more comfortable or popular place in town on the fourth of July than the canteen. Barrels of ice water were provided for the hot and thirsty, cots for sleepy babies, tables for the many who wanted a comfortable place to eat their lunch, towels and baths and everything for the hot, tired crowds, and hundreds availed themselves of these accommodations.

All of this was in charge of one of the canteen workers.

The following letter was received by the Junior Red Cross Branch of Bedford:

France, June 10, 1919.

My Dear Benefactors:—

I am happy to announce that I have received the gift which you have been good enough to send for my little Appoline. The money I will use at this time to keep our life together. I pray, my dear benefactors, accept the expression of my grateful sentiments.

C. S. Nord.

MRS. SOPHIA DIEHL KOONTZ

Mrs. Sophia Diehl Koontz of Friend's Cove, died July 10, 1919 in the Western Maryland Hospital where she was operated on for cancer of the stomach. She was seventy-five years of age and the daughter of the late Emanuel J. Diehl. She was a faithful and consistent member of the Friend's Cove Reformed church being confirmed at the age of fourteen by the Rev. C. F. Hoffmeier, April 7, 1864 she was married to D. Frank Koontz with whom she lived until the time of her death. She is survived by her husband, D. Frank Koontz; two brothers John I. Diehl and Elias E. Diehl of Friend's Cove; and the following children, N. E. Koontz, and E. R. Koontz of Friend's Cove and Mrs. S. F. Whetstone of Everett, Pa. The funeral was held at her late home Sunday morning with further services at the Cove Reformed Church. Interment was made in the adjoining cemetery.

SMITH HOAGLAND

Smith Hoagland died, at his home near Wolfsville on Monday morning June 30th after a brief illness. He was a son of Mr. and Mrs. George A. Hoagland of Bedford Township and was 30 years, 7 months and 21 days old. He is survived besides his parents by a wife who was Edna Diebert, and three small children, Floyd, Johnny and Fred, and the following brothers and sister: William C. of Cessna; Samuel, George and Paul and Mrs. George L. Pettus of Bedford township; and Robert H. Hoagland of Akron Ohio. On Wednesday afternoon after a short service at the home the body was taken to St. Paul Reformed church near Cessna where the funeral services were conducted by his pastor Rev. J. H. Dorman assisted by Rev. Pitinger of Wolfsville. Interment was made in the Church Cemetery.

EBERSOLE — BRANT

On the evening of July 13th Mr. James M. Ebersole and Miss Edna M. Brant both of New Enterprise, Bedford County, Pa., were united in marriage by Rev. C. F. Gephart at the Lutheran parsonage, Woodbury, Pa. They will go to housekeeping at once, engaging in farming at Lafayetteville. Their friends of the community extend best wishes.

WOLFE — SHAFFER

Mr. Charles Wesley Wolfe, who lately returned from service over sea and Miss Nellie M. Shaffer daughter of Mr. and Mrs. Irvin Shaffer, of near New Paris, were united in marriage on July 1, 1919, at Cumberland at the M. B. parsonage by an M. E. minister of that city. Success

Cross Country Tour Is Greeted Royally

Information Collected Vital To All Auto Users

The epoch making transcontinental trip of two complete Motor Transport Corps companies of war strength consisting of 42 army trucks, which started from Washington on July 7, and which passed through Bedford County lodging in Bedford on Wednesday July 9 is receiving an enthusiastic welcome at all points along the Lincoln Highway which will be followed over almost the entire journey. The trucks are scheduled to arrive in San Francisco September 1.

This first Atlantic to Pacific military trip will be a significant illustration of the tremendous possibilities of highway transportation. Furthermore it will demonstrate the practicability of long distance freight haulage and the urgent necessity of linking up interstate highway routes and presenting the people with a unified system of national roads.

The army truck train comprises the following: five passenger cars, thirty five trucks, all of army types, two ambulances, six motorcycles, two tank trucks, two kitchen trailers, two water tank trucks, one engineer shop truck and one searchlight truck. Technical personnel from the motor transport corps, engineer corps, medical corps, field artillery and air service are making the journey.

According to Brigadier General Charles P. Drake, chief of the Motor Transport Corps, the purposes of the long trip will be fourfold: To provide service and performance tests equipment. To collect data to be used in connection with the technical training of the personnel of the M. T. C., and to provide an opportunity for extensive study in terrain observation. To demonstrate the practicability of long distance commercial motor truck transportation and to point out the necessity of governmental appropriations to assist in the continuous improvement of all through connecting routes in the United States. And to provide an opportunity for procuring recruits for the Motor Transport Service.

Extensive study in terrain is being carried on by officers of Engineering, Corps and Air Service, who have been assigned to make the trip and much data of great value to vocational schools established by the Motor Transport Corps in the training of the commissioned and enlisted personnel will be secured. Daily reports will be sent into the war Department of the individual performance of each vehicle, and also engineering reports relative to the condition of the highway, nature and strength of bridges, locations of grades and recommendations for improvements.

The convoy is under command of Colonel A. Owen Seaman of the General Staff who will have charge as far as Salt Lake City, Utah, at which point General Drake will take personal command.

All motor trucks must be fitted with tires and all fleet owners must pay tire bills, so that the determination of the time when worn tires must be removed is of the utmost importance to the fleet owner whether he operates five or fifty trucks. It is self-evident that if a tire is left on a wheel after it has been worn down too near the edge or rim of the steel base, the cushioning effect of

the tire may be entirely lost and expensive mechanical repairs result.

In order to determine just at what point of wear a solid tire should be removed, THE COMMERCIAL VEHICLE has asked several of its subscribers who own and operate large fleets of trucks to give their experience in this regard. As a means of obtaining definite information on this subject, these three questions were asked:

1. How do you determine when to remove a worn tire?

2. If a tire is kept in place until it is worn down almost to the top of the edge of the steel base, have you found that greater vibration has resulted and consequently greater repairs?

3. What experience have you had with tire companies in adjusting mileage on solid tires which they claim still have more mileage in them?

These three questions were put to Nat Mallott, of the Motor Haulage Co., New York City, which operates a fleet of forty seven Pierce Arrow 5-tonners. He answered the first question by stating that the tires used on practically all of his trucks are removed when they have worn down evenly to a line across the tire drawn at a point 1 inch above the edge or top of the steel tire base, as shown in the illustration on this page. The depth of the rubber of the tire when worn down to the point when it is removed is measured from the top of the edge of the steel base instead of from the line of joining of the resilient rubber and the hard rubber base because the measurement taken from the top of the rim can be made more easily.

FRONTS MORE IMPORTANT THAN REARS

Strange as it may seem at first thought, you should pay closer attention to the tires on the front wheels of trucks than on the rear wheels. Further consideration of the subject, however reveals the correctness for the closer scrutiny of the front tires because of the fact that the entire engine with all of its delicate mechanism is carried principally by the tires on the front wheels. In no case is a front tire permitted to run after it has worn down to the point 1 inch above the rim of the steel base, although in emergencies rear tires may be worn down a trifle below that point. It is unsafe in the case of the front tire because when going over rough roads it is possible that the rim of the tire base may come into contact with the ground and thereby impart shocks which will be transmitted direct to the engine, frame, springs, steering gear mechanism and the front wheel bearings. More chances are taken in running rear tires after the maximum wear has been reached because of the fact that duals are used and the second tire of the dual will get the truck home if the other tire be destroyed.

There has had no difficulties in making adjustments when tires have been taken off when worn down to the line 1 inch above the edge of the steel base for the simple reason that in every case such tires have always given much more than the guaranteed mileage.

Marriage Licenses

Harry A. Miller and Gertrude L. Garlick of Snake Spring township.

Bert Nicodemus and Anna S. Poorman, of Schellsburg.

Elmer J. Gordon and Martha Agnes Smith of Everett, Pa.

War Department

Will Have To Dismiss 3,000 Employees

Secretary Baker of the War Department has issued instructions to all bureau chiefs to avoid any and all deficiencies in appropriations. Congress reduced the appropriation for war workers from \$8,500,000 to \$4,000,000 which will necessitate the gradual discharge of more than 3,000 employees who are on the temporary roll.

Methodist Episcopal Church
John T. Bell—Pastor.

Sunday School 9:45 A. M. Divine Worship 11:00 A. M.
Evening service 7:30 P. M. Rev. Harter of Hollidaysburg will preach at both services. All welcome.

St. John's Reformed Church
Rev. J. Albert Byler—Pastor

Sunday School 10 A. M. Divine Worship 11 A. M. Pastor's subject: "Prisoners of Hope." at 7:30 P. M. "For what does the Reformed church stand?" A place and a welcome for all.

Amick Reunion

The Amick Reunion will be held this year in John Stayer's Grove in Black Valley, two miles south of the Earlston Furnace on Saturday, August 2. All the family connection are urged to be present. All friends are heartily welcome.

R. L. Amick, President.

MRS. EVA MANSPEAKER

Mrs. Eva Manspeaker, a well known resident of East Providence township, died Tuesday morning at her home near Ray's Hill. Deceased, whose maiden name was Colledge, was born near Everett about 74 years ago. Her husband, Wm. R. Manspeaker, passed away about a year ago. Two children survive—Maude, wife of John L. Bowser, and Harry Manspeaker, both of East Providence Township. The funeral will take place on Thursday afternoon in the Methodist Church near her late home and interment made in the adjoining cemetery.

DISCHARGED MEN HEALTHY

More than 93 per cent of the 20,000,000 officers and men of the Army who have been demobilized since the signing of the Armistice were discharged with a clean bill of health according to an announcement from the office of the Surgeon General of the Army. Six per cent were held on account of communicable diseases.

The aeroplane is here to stay, but nothing that can happen in the air will be as thrilling as the ninth inning with the bases full.

Peace Data Makes Three Truck Loads

It took three large army trucks to transport the mass of data compiled in pamphlet and document form at the Peace Conference.

The three truck loads of historical pamphlets and official documents were brought back from Paris with the President and were moved to the White House where they will be sorted and filed away for future reference by a small size army of clerks.

The President it is stated will have particular need of this new library during the weeks to come, when there will be a large number of questions to answer on the different phases of the treaty.

Army surplus Food Worth 121 Million

The War Department has \$121,000,000 worth of surplus food on hand much of which could have been declared surplus and released to the public last February, Chief of Staff March declared before the House of Representatives committee investigating War Department expenditures. He also admitted that the subsistence division of the quartermaster corps is open to criticism for allowing ham and bacon to deteriorate in army warehouses.

Latest official figures produced by General March show the following surplus food stored on July 8: Corn beef \$24,000,000; bacon, \$23,600,000; corn beef hash, \$10,000,000; roast beef, \$20,500,000; frozen meats including poultry \$20,000,000; and canned vegetables \$23,000,000.

Government To Buy 288 More Miles Of Victory Silk

The War Department announced that it will require 288 more miles of silk for the Victory Medal to be issued to soldiers. This is in addition to 105,000 yards or 59 miles recently ordered from a silk manufacturer at Allentown, Pa.

It has taken months of effort, the War Department says, for American silk men to succeed in producing the rainbow blend of colors.

Moving Saves U. S. \$365,560 A Month

A saving to the Government of \$365,560.76 a month in rentals of buildings in the District of Columbia has been effected by the Public Buildings Commission in reassigning office space in various departments.

The Government rent bill for July last year was \$964,556.20 compared with \$607,995.44 for July of this year.

Soft Drink Tax To Be Repealed

Repealing of the taxes on soft drinks, ice cream, moving pictures, and other "minor" luxuries will soon be voted by Congress Republican leaders say.

"The prospect of loss of revenue by repealing these taxes has delayed action." The fact that Congress has received so many petitions urging repeal of these taxes shows it is time for Congress to act.

Navy to Build Dirigible Plant.

ELECTION DATE CHANGED

Governor Sprout has signed a bill changing the date of the fall primary election from Wednesday, Sept. 17, to Tuesday, Sept. 16.

NC 4 To Go In National Museum

The navy seaplane NC-4, in which Lieut. Commander A. C. Read made the first successful air flight across the Atlantic, is to be placed in the National Museum in Washington, D. C. for preservation along with other historic air machines. The NC-4 has arrived at New York and after a short exhibition in Central Park will be placed in the National Museum at Washington.

Trinity Lutheran Church
Rev. C. R. Allenbach—Pastor

Sunday School with departments for all at 9:45 A. M. Morning worship with sermon at 11 o'clock, subject, "Examples." Evening worship at 7:30 "The Promised Land." Wednesday evening praise and prayer service at 7:30. A cordial invitation is extended to all to come and worship with us.

Friend's Cove Reformed Church
Walter C. Pugh, Pastor.

Sunday July 20: Sunday School at Cove, Zion and Trinity 10:00 a. m. and Divine Worship at Cove church 11:00 a. m.

The Ladies Bible Class of the Cove Sunday school will give their play "The Minister's Wife's New Bonnet" Saturday evening at the Rainsburg Hall. Admission 15 and 25 cents. Come and bring your friends.

Daniels Welcomes Fliers

Secretary Daniels welcomed home the commanding officers and crew of the American naval transatlantic light squadron with the declaration that they had "made a new day and accomplished what not the wisest among us can see the end of."

The Secretary said in part, "I congratulate all of you gentlemen upon the achievement, which is epoch-making in the history of the world. I share with Commander Read his very splendid utterance that his only regret was that not all of the ships got across; not due to lack of courage, judgment or skill, but because of obstacles that could not be overcome. I congratulate you and all America is proud of you."

Daniels Would Honor All NC Crews

Secretary Daniels has announced that he would recommend that Congress authorize a special medal for, and extend the thanks of the nation to the members of the crews of the NC seaplanes which participated in the first transatlantic flight. He will recommend that in addition some special distinction be shown Lieut. Commander Albert C. Read and the crew of the NC-4, the only plane to complete the flight.

Army To Fence Part Of Mexican Border

The Construction of a wire fence two miles in length between Calexico, Calif., and exicali, Mexico, was authorized by the War Department.

A military road between these two points was under consideration but because of the cost and its doubtful value, the construction will not be undertaken by the department.

To Probe R. R. Passes

A record of all railroad passes, sleeping or dining car service asked of the Railroad Administration, in a resolution introduced by Senator Newberry of Michigan. Mr. Newberry's resolution asked that the names of all pass holders be given and a reason assigned for the issuance of each pass.

White House Was All Polished Up

The White House was in "apple pie" order, both inside and out, by the time the President and Mrs. Wilson got back in Washington.

Squads of men and women were busy in the Executive Mansion giving the floors a last scraping and polishing, and brushing the last flecks of dust from the furniture and woodwork.

In the grounds tree surgeons worked, pruning the big trees which were planted there more than 100 years ago.

Bedford Presbyterian Church

Sunday School 10 A. M. Divine worship 11 A. M. and 7:30 P. M. Christian Endeavor 6:45. Wednesday service 7:30.

Friend's Cove Lutheran Charge
A. B. Miller—Pastor

Cumberland Valley: Sunday School Sunday morning at 10. Preaching at 11.

Rainsburg: Preaching Sunday afternoon at 2. Catechetical instruction right after.

St. Marks and St. James: Sunday School at 10 a. m.

Bald Hill: Sunday school Sunday afternoon at 1:30.

The United States mints turned out \$8,161,000 pieces of money in June, thereby establishing a new high record for production.

The return of the President implies that it is "over, over there." But the U. S. Senate offers direct suggestions that it is not over, over here.

Over Million Shells Fired In Four Hours

The most intense concentration of artillery fire ever recorded was that of the American troops in the battle of St. Mihiel, fought from September 12 to 17 and which was the first distinctly American offensive of the war. It was fought chiefly by American troops and wholly under the orders of American officers. In this battle the American artillery fired more than one million shells in four hours.

Two comparisons with Gettysburg emphasize the magnitude of the St. Mihiel operation. At St. Mihiel, 550,000 Americans were engaged; at Gettysburg the Union troops numbered approximately 100,000. In three days at Gettysburg the Union artillery fired 23,000 shells. The St. Mihiel offensive cost the Americans about 7000 casualties, less than one-third the Union losses at Gettysburg.

Two Chances To Kill The Hessian Fly

The pest lives through the winter in the bases of wheat stalks.

SPRING FLIGHT

In Spring the winged flies emerge from the injured wheat and fly to the healthy wheat to lay eggs. They may hatch from these eggs, sap the plant's strength, change into the flyless form again and remain in the stubble when the wheat is cut. Flowing the stubble under will kill many of them.

FALL FLIGHT

In the fall the second generation of flies hatch out, leave the stubble and look for young wheat to feed on.

ADAPTED FROM U.S. DEPT. AGR. BUL.

If they can find no young wheat above ground they will die in a few days.

Sow Late And Fertilize To Make Up For Lost Growing Time

The illustration shows the two points in the life history of the Hessian fly where it can be destroyed most readily. Late seeding is an essential part of this program for eradication, which in turn necessitates the use of fertilizer, or other means of soil enrichment, in order to get the young plants through the winter in a vigorous condition.

FERTILE SOIL A BIG FACTOR IN CROP PRODUCTION

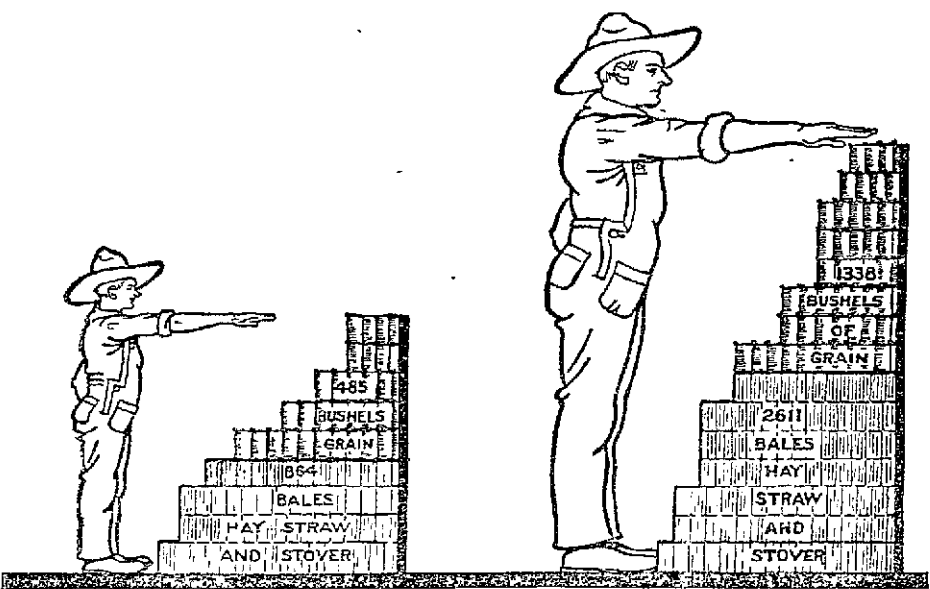

Rich Soil Increases the Labor Efficiency of the Average Farm Hand.

Back in 1917 the extension department of the University of West Virginia made a census of the state with a view to learning what acreage of crops the average farm hand cared for. They found that on the better-class farms a man averaged to care for 26 acres of crops, 16 acres of meadow and 17 animal units.

Of course the fact that a man cultivates a certain number of acres has really but little bearing on the final question. It is the amount of crop

wheat), and 86,400 pounds of hay, straw and stover yearly. If, on the other hand, this same man were to spend his time growing crops where fertilizer amounting to 743 pounds per acre was applied each year, his total yearly crop production would mount up to 1,338 bushels of grain and 261,000 pounds of hay, straw and stover.

The man working on improved land was able to produce three times as large a crop as the man working on ordinary soil. Not only is there a prac-

On Unfertilized Land

On Fertilized Land

A Fertile Soil Increases the Hired Man's Efficiency.

which he grows which really determines his value. Thus he must undertake a partnership with the soil, for it seems that the quality of the soil is even more important than the man himself in attaining the ultimate goal—big crops.

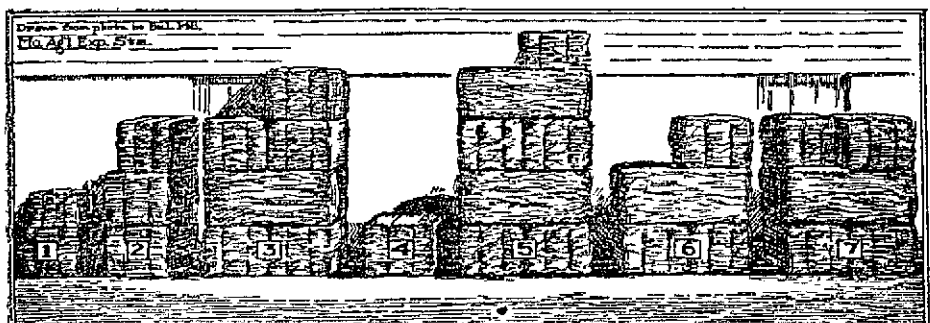

If we consider this average farm hand as applied to the ordinary unfertilized land as it exists at the West Virginia experiment station, we find that he is able to produce from the 43 acres 485 bushels of grain (corn and

tical effect through increasing the crop production per man, but there is a very decided moral effect on the man himself. Being human, the farm hand likes to work with thrifty luxuriant crops. He unconsciously puts forth his greatest efforts when he has before him the stimulus of a big yield.

He goes into a slump and gets disgruntled and discouraged with the prospect of a poor scrubby crop. Perhaps, after all, he is only reflecting the attitude of the man he works for.

GROW MORE WHEAT AND CLOVER

Missouri Experiment Station Shows How Fertilization of Wheat Crop Increases Both the Yield of Wheat and the Next Year's Yield of Clover.

1. Legume.
2. Legume, Lime.
3. Legume, Lime, Phosphoric Acid, Nitrogen.
4. No Treatment.

5. Legume, Lime, Phosphoric Acid, Nitrogen and Potash.
6. Manure Alone.
7. Manure and Rock Phosphate.

The illustration above is drawn from a photograph in Bulletin 148 of the Missouri experiment station. It shows the result on the succeeding clover crop of fertilizer applied to wheat. The fertilizer not only increased the yield of wheat, and at a rate to pay for itself and leave a nice margin of profit, but in addition it made a big increase in the clover crop for the next year. A combination of legumes, lime and complete fertilizer produced the biggest gain, even greater than that produced by barnyard manure.

THE ABANDONED FARM MOVING WESTWARD

In the May issue of the Agricultural Review, R. T. Throckmorton, Kansas experiment station, has the following to say regarding the maintenance of fertility in that state:

"Plant food to the value of \$395,000, 000 is being extracted from Kansas soils this year. This plant food would produce 200,000,000 bushels of wheat.

"Kansas soils are gradually but surely becoming unproductive, and the maintenance of soil fertility is a matter of concern to every farmer, particularly the wheat grower.

"In the face of the large number of abandoned farms and the rapidly increasing population, it is high time farmers began to do their work more scientifically."

This is a warning which must be heeded—the barrel will soon run dry unless the draining of the spigot is replaced at least in part.

ARGENTINA FIXES PRICE OF WHEAT

The Argentine government has fixed the minimum price for export wheat at \$1.55 per bushel. A rate of \$35 per ton of 2,240 pounds, equivalent to 94 cents per bushel, from Buenos Aires to New York, has been quoted by the United States shipping board. This would make the price of Argentine wheat at New York \$2.19 per bushel. According to International Institute of Agriculture at Rome the rate from Buenos Aires to Liverpool is 34 cents per bushel, which would make the price of Argentine wheat at Liverpool \$1.59 per bushel. In this connection it is interesting to note that the British government has fixed the sale price of imported wheat at \$2.40 per bushel.

It would seem from the above that the American farmer may well anticipate a good price for the 1920 wheat crop.

FOR BETTER ROADS

MACHINE FOR MAKING ROADS

Apparatus Invented by Nebraska Man for Forming Roadways With Material Directly at Hand.

The Scientific American in illustrating and describing a road-making machine, the invention of M. N. Latta of Valentine, Neb., says:

"This invention relates generally to road-making apparatus, and more particularly to roadway machines for forming roadways with the material directly at hand, where good horse

Side View of Road-Making Machine.

roads are difficult to make, the general object being the provision of a machine movable along a selected roadway site, capable of the formation of wheel tracks in the course of its movement. A further object is to provide a machine capable of ready adjustment and interchange of parts for other purposes; for instance, it can be transformed into a freight car in a very short time. For the grading of roads the machine is self-loading and self-adjusting, automatically throwing the high side to the low side, whether at left or right.

DEFINITION OF ROAD TERMS

List of Technical Names Taken From the Program of the Canadian Good Roads Congress.

With the progress of road building there has come into use a number of terms more or less technical, but which should be well known. The following list is from the program of the Canadian Good Roads congress:

Aggregate.—The mineral material, such as sand, gravel, shells, slag, or broken stone, or combinations thereof, with which the cement or the bituminous material is mixed to form a mortar or concrete. Fine aggregate may be considered as the mineral inert material which will pass a one-fourth-inch screen, and coarse aggregate the material which will not pass a one-fourth-inch screen.

Binder.—(1) A foreign or fine material introduced into the mineral portion of the wearing surface for the purpose of assisting the road material to retain its integrity under stress, as well as, perhaps, to aid in its first construction. (2) The course, in a sheet asphalt pavement, frequently used between the concrete foundation and the sheet asphalt mixture of graded sand and asphalt cement.

Bond.—The combined action of inertia, friction, and of the forces of adhesion and cohesion which helps the separate particles composing a crust or pavement to resist separation under stress. Mechanical bond is the bond

produced almost wholly in a well-built broken-stone macadam road, by the interlocking of angular fragments of stone and the subsequent filling of the remaining interstices with the finer particles.

Water-Bound.—Bonded with the aid of water.

Cement.—An adhesive substance used for uniting particles of other materials to each other. Ordinarily applied only to calcined "cement rock," or to artificially prepared calcined and ground mixtures of limestone and silicious materials. Sometimes used to designate bituminous binder used in bituminous pavements, when the expression "bituminous cement" (q. v.) is understood to be meant.

Cement Concrete.—An intimate mixture of gravel, shell, slag or broken stone particles with certain proportions of sand or similar material, cement and water, made previous to placing.

Course.—One or more layers of road material spread and compacted separately for the formation of the road or pavement. Courses are usually referred to in the order of their laying, as first course, second course, third course, etc. Also a single row of blocks in a pavement.

Crown.—The rise in cross-section from the lowest to the highest part of the finished roadway. It may be expressed either as so many inches (or tenths of a foot), or as a rate per foot of distance from side to center, that is, "the crown is four inches," or "the crown is one-half inch to the foot."

Roads for Main Lines.

The main lines of travel can, and must, be given some other kind of road than a simple dirt road. Every state in the Union has deposits of gravel, and a good gravel road is very good if it is properly maintained.

Binder for Stone Road.

If a broken-stone road gets very heavy auto traffic then it must be laid with a tar or asphalt binder to keep the pieces of stone from grinding on each other and finally powdering up under traffic.

FERTILIZER MANUFACTURERS HAVE STANDARDIZED THEIR PRODUCT

The "Standards" for Wheat.

The wily and elusive fertilizer analysis has been roped, tied and branded. No more will it be free to bob up in forty different combinations to worry the perplexed farmer, if the plans of the fertilizer manufacturers can be carried out to a full finish.

Instead of a thousand or more analyses, each differing from its nearest relative but little, the manufacturers with the aid of the soil and crop experts of the different states have picked out a score or so analyses which will answer all needs, whether the crop be wheat or onions, and whether the soil be loam or clay.

This is a most important step in advance, and through the elimination of so many needless grades, each requiring its separate mixing, separate bagging, and separate listing and book-keeping, considerable money and no end of confusion will be saved all along the line.

The analyses selected for wheat are:

2-10-6	0-12-4
2-10-4	0-12-2
2-12-2	0-16-0
2-12-0	

Where no manure is used on wheat land, where wheat is planted late, or

where land is not plowed for wheat, select from the first group.

Where plenty of manure is used, or where clover does well and is grown regularly and at short intervals in the rotation, select from the second group.

On sandy soils, where clover fails, or where no manure is used, use the higher potash analyses.

WILL YOUR LAND GROW GOOD CLOVER?

All over the country clover is the foundation of good farming. Land that will grow good clover will ordinarily grow good corn, good oats and good wheat. Of course the growing of clover in itself makes the other crops produce more bountifully, but clover will not grow on poor land. The first requisite for clover is a sweet soil. A sour soil can be made

sweet by liberal use of lime, either in the form of ground limestone or burnt or hydrated lime.

If plant food is lacking in the soil it must be supplied before good clover, or any other crop, will grow. Some farmers try to supply this plant food through the long-time process of adding small amounts of manure and turning under a sod now and then. This plan may maintain fertility but it will seldom add fertility. The small crops grown on the impoverished fields do not supply sufficient humus-making material to get the soil into a loose, mellow condition, and since but little plant food is available from year to year no progress toward higher fertility is made.

It is poor business to spend years in trying to "bring up" badly depleted soil by cropping and cultural methods alone. There is nothing to build on. It is far cheaper in the end to buy good fertilizer at first and grow crops which will not only pay for the labor expended but will leave humus-making roots and stems in large enough quantity to improve the soil for next year's crop.

After a year or two of this latter sort of treatment most any soil, except the lightest sands or heaviest clays, will grow good clover.

OPPORTUNITY TALKS

Opportunity is talking to you.

She says that one hundred and twenty million people of America are more prosperous than ever before.

She says that these one hundred and twenty million people who had the resources and the courage to be the decisive factor in winning the war are all set, with greater resources and greater courage, to win the victories of peace.

She says that these people, instead of owing Europe five billion dollars as they did in 1914, now have ten billion dollars coming to them from Europe.

She says that America has production and distribution efficiency that would have been regarded as impossible two years ago.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL LESSON

(By REV. P. B. FITZWATER, L. L., Teacher of English Bible in the Moody Bible Institute of Chicago.)
(Copyright, 1919, Western Newspaper Union)

LESSON FOR JULY 20

THE LORD'S SUPPER.

LESSON TEXTS.—Mat. 26:26-30; I Cor. 11:23-24.

GOLDEN TEXT.—For as often as ye eat this bread, and drink this cup, ye do show the Lord's death till he come.—I Cor. 11:26

ADDITIONAL MATERIAL.—Mark 14:22-26; Luke 22:14-20; I Cor. 10:14-21.

PRIMARY TOPIC.—Remembering Jesus (Luke 22:19).

JUNIOR TOPIC.—The Lord's Supper reminds us of Jesus.

INTERMEDIATE TOPIC.—The meaning of the Lord's Supper.

SENIOR AND ADULT TOPIC.—Communion with Christ and with one another.

1. The Institution of the Lord's Supper (Matt. 26:26; I Cor. 11:23).

1. Time: It was on the night of the betrayal of Jesus, just after the betrayer had been announced.

2. The circumstances: In connection with the eating of the Passover. At the command of Jesus the disciples made ready the Passover, and while they were eating, Jesus took bread, blessed it and gave it to the disciples.

3. Elements: (1) The bread. This doubtless was the common bread of the Passover feast. (2) The cup. This cup consisted of the fruit of the vine.

11. The Significance of the Lord's Supper (Matt. 26:26-28; I Cor. 11:24-26).

Jesus took natural and literal elements and made them to be symbols of his own body and blood. Just as our bread and drink are assimilated into brain and brawn, becoming an integral part of our body, so by means of these symbols the communicant partakes of Christ. He becomes a part of us and we are in him. It is both a memorial and a prophecy.

2. A memorial of the Lord (Luke 22:19). When he went away he left the bread and the cup for the disciples by which to remember him. Those who love him will desire to keep sacred this memorial.

2. To show the Lord's sacrificial death (I Cor. 11:26). He did not die as a hero or as an example of unselfish devotion, but as a substitutionary ransom. On the cross he made expiation for our sins.

3. It is a guaranty that our sins are forgiven (Rom. 4:25). When the believer partakes of these elements his faith is confirmed. "It is a signet of the Son of God attached to redemption."

4. Through them the believer received Christ (I Cor. 10:16). He thereby participates in the body and blood of Christ, becoming a member of his body. Christ liveth in the believer (Gal. 2:20). The Holy Spirit communicates the life of Christ to believers, making them one body, joined together (Eph. 4:16). This union is illustrated by the figure of the human organism (I Cor. 12:12-27); the vine and branches (John 15:1-8); the husband and wife (Eph. 5:25, 26); we are one bread and one body (I Cor. 10:17).

5. A forward look to a completed redemption (I Cor. 10:26). When faith is exercised in Christ, redemption begins, and its completion will take place at the coming of Jesus Christ (I Thess. 4:16, 17). The bread and the cup constitute the keepsake of the Lord until he returns. These elements possess an immense psychological value both as a memorial and a prospect.

III. Qualifications for Participation in the Lord's Supper (I Cor. 11:27-34).

1. A proper apprehension of its meaning (v. 27). Eating and drinking "unworthily" does not refer to the demeanor of the communicant, but to the failure of the communicant to grasp its meaning and importance. Therefore, to thoughtlessly engage in this service is to do it "unworthily." Only a regenerated person can discern the Lord's body (v. 29, cf. 2:14). Faith in the integrity of Christ's person and work is essential. Anyone who does not believe in the absolute deity of Christ and his vicarious atonement is an unworthy communicant.

2. Church membership (I Cor. 11:18-22). The Lord's body is the church which is composed of regenerated men and women, united to Jesus Christ as head and to each other as members of that body by the Holy Spirit.

3. Orderly walk. The disorderly should be debarred from the Lord's table, examples of which are the following: (1) Immoral conduct (I Cor. 5:1-13). It is perilous to the individual who is guilty of immorality to approach the Lord's table (v. 30). Sickness and death are oftentimes visited upon such. This explains why some are mysteriously taken away in death. (2) Heresy (Titus 3:10; John 4:2, 3). (3) Schismatics (Rom. 16:17). Those who are causing divisions in the church should be debarred.

4. Right at the Center.

Our habitual thoughts and actions determine our characters and they are made moment by moment. If at the center we are stayed on God the circumstances must be right.—Samuel Fallows.

Would You?

Would you remain always young and would you carry all the joy and buoyancy of youth into your mature years? Then have care concerning but one thing—how you live in your thought world.—Ralph Waldo Trine

The Lesson The Singer Learned and Sang

A catchy song is always relished at the close of a perfect day. The young darkey has been aroused in spirit to the value of buying at home as against the dangers of dabbling with the mail order and catalogue houses. He has seen wherein those who have bought elsewhere have suffered loss, while those who have traded at home have benefited themselves and their community. Those who hear him "out of the heart" song, also realize and appreciate the value of his comely words as carrying a real lesson and like the singer have resolved to deal with the home merchant.

MORAL:—Every song has a meaning, but the song of the home is always the most cheerful.

Yes! He bought that away from here and what has he gained by it ne thought it a bargain but they double up on him.

Smallest National Park.

The smallest of our national parks contains just thirty-eight acres and is on Prince of Wales Island, Southeastern Alaska. It was created but a year or so ago by presidential proclamation. The park is an abandoned Indian village, chiefly interesting for its totem poles. There are, also, some buildings, which are the best known examples of Haida Indian architecture.

Holmes Caught Napping.

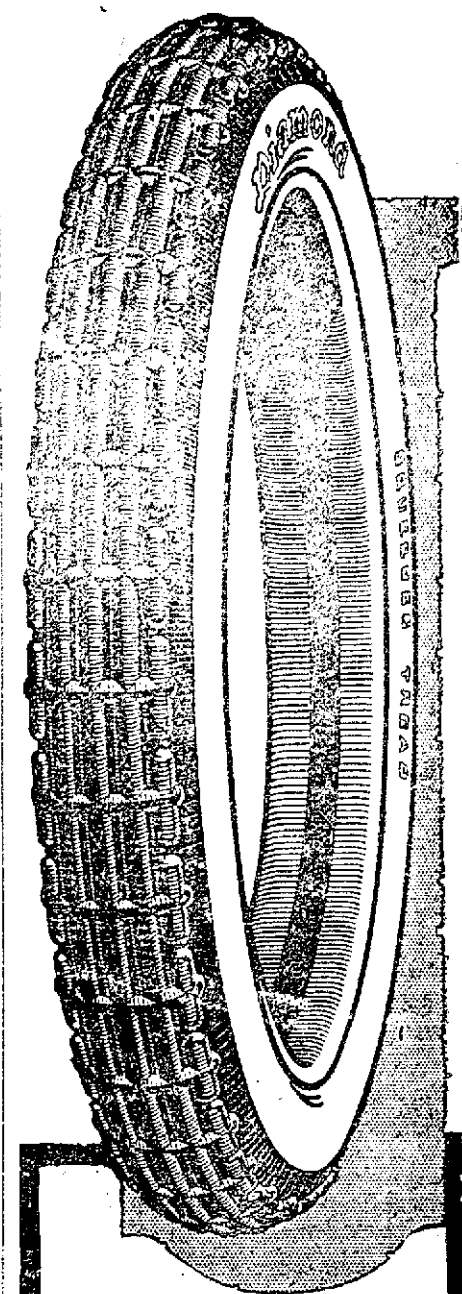

Referring to our recent note about the English reporter giving the baseball score as "Two-love," a correspondent reminds us that no less a writer than Conan Doyle once made a curious blunder in describing our national game. "The catching," he wrote, "seemed to me, extraordinarily good, especially the long catches by the bleachers."—Boston Transcript.

Looking Ahead.

A baby boy arrived one morning, Hunter, three years old, had been given two billy goats for his last birthday. That morning his father said: "Now Hunter, you don't need two goats, suppose you give your little brother one. What do you say?" Hunter didn't say anything for a minute, then he said: "Father, I've been thinking it over, and I've decided maybe I'd better save that goat for my own little boy."

Folly of Monarchical Government.

As the exercise of government requires talents and abilities, and as talents and abilities cannot have hereditary descent, it is evident that hereditary succession requires a belief from man to which his reason cannot subscribe and which can only be established upon ignorance; and the more ignorant any country is, the better it is fitted for the monarchical species of government.—Thomas Paine.

Diamond SQUEEGEE TREAD Tires

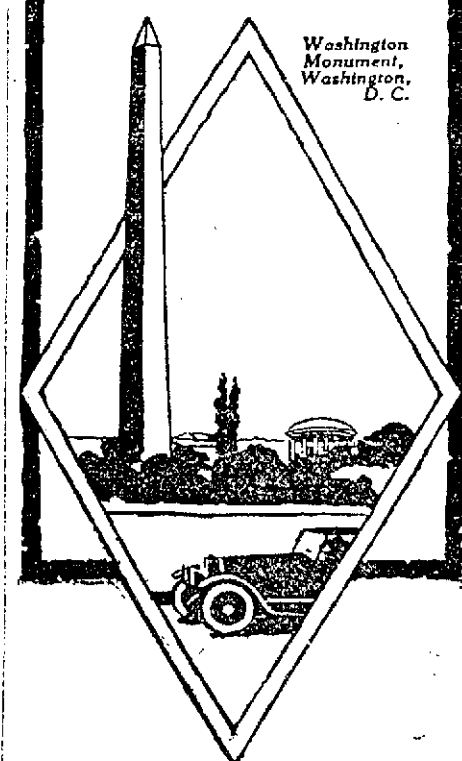

Europeans marvel at American Corporations

All Europe realizes now that American business men, turned soldiers, simply applied methods of American business to war-winning. No wonder that now Foreign Nations marvel at American corporations—not only at their efficient big scale methods, but their economies.

Justly—for American business men scrutinize every penny. When they buy tires, they study values and compare prices. Corporations all over the country are concentrating on Diamonds—the people in this town who buy tires thoughtfully, calculatingly, are buying Diamonds.

For Diamonds are giving thousands of extra miles—at LESS THAN AVERAGE COST. Let us present some comparative figures to you.

POLITICAL PARTIES, PETITIONS, ELECTIONS ETC.

The political parties which will nominate their candidates at the coming primary election to be held Tuesday, September 16, 1919 and which general election will be held on Tuesday, November 4, 1919 are

REPUBLICAN
DEMOCRATIC
SOCIALIST
PROHIBITION

The first day for securing signatures to petitions to file with the Commonwealth at Harrisburg is Monday, June 30, 1919 and the last day to file these petitions at Harrisburg is Friday August 8th 1919. One office in Bedford county must be certified to the State, that of Associate Judge. Judge Anthony Sammel's term expires.

The first day to secure signatures for county, township and borough offices is Friday, July 11, 1919 and the last day to file these petitions, with the County Commissioner's is Wednesday August 20, 1919. All township offices expire this year and all county offices except one Poor Director and the Jury Commissioners.

The last days to be assessed in boroughs and townships for November election are Tuesday and Wednesday September 2 and 3, 1919. Assessors must sit at the polling places on these days.

The last day to pay tax to qualify for November Election is Saturday October 4, 1919.

All voters must declare their party affiliations to vote a party ballot but do not need to declare for voting a non-partisan ballot. This applies only to the Primary.

"President Maker."

Thurlow Weed, an old-time political leader of New York, was called "the president maker." He was prominent in procuring the nomination of General W. H. Harrison in 1840, of General Taylor in 1848 and of General Scott in 1852, though the last named was not elected. In 1860 he supported Lincoln, though he had favored the nomination of William H. Seward of New York. He never held any public office.

Advertising a Sale!

YOU don't leave your rig in the middle of the road and go to a fence-post to read a sale bill do you? Then don't expect the other fellow to do it.

Put an ad in this paper, then, regardless of the weather, the fellow you want to reach reads your announcement while seated at his fireside.

If he is a prospective buyer you'll have him at your sale. One extra buyer often pays the entire expense of the ad, and it's a poor ad that won't pull that buyer.

An ad in this paper reaches the people you are after. Bills may be a necessity, but the ad is the thing that does the business.

Don't think of having a special sale without using advertising space in this paper.

One Extra Buyer
at a sale often pays the entire expense of the ad.

WANTED WAR FOR FINANCIAL GAIN

TRIBUNE EDITORIAL WRITER
TESTIFIED PAPER THOUGHT
INTERVENTION WOULD
BE PROFITABLE.

NINTH WEEK OF FORD CASE

Famous Million Dollar Libel Case Continues in Mr. Clemens—Edsel Ford is Called to Stand by Newspaper.

Mr. Clemens, Allen—Editors who directed the policy of The Chicago Tribune, and editorial writers who put that policy into printed words, were the witnesses produced by the defense during the ninth week of the Ford-Libelle \$1,000,000 libel case.

Lindsay Blake, chief editorial writer of the Tribune, was one of the most interesting witnesses. Mr. Blake testified that he had deliberately permitted the characterization of Mr. Ford as an anarchist because it seemed to him to sum up Mr. Ford's activities. He testified at length, under cross-examination, concerning the attitude which his paper took in favor of war with Mexico but against war with Germany, and admitted that The Tribune had in mind the material benefits which would accrue to the United States in the event of intervention, and the fact that no such gains could be reaped from war with Germany.

Ford Was in the Way.

During the course of his testimony Mr. Blake characterized the utterances and the attitude of Mr. Ford as "notorious." Ford counsel took the stand that Mr. Ford's position could not have been notorious to readers of The Tribune because The Tribune never referred to the alleged statements which it is now using as a means of justifying its attack. Its attitude towards Mr. Ford, counsel attempted to show by questioning the witness, was based upon the fact that just when it seemed that the paper's long campaign for war with Mexico was about to bear fruit, and troops were being hurried to the border, it suddenly found Henry Ford in its way.

Submarine warfare, in the estimation of The Tribune, the witness said, was never sufficient cause for war. Mr. Blake admitted that the newspaper did not demand armed redress after the sinking of the Lusitania, and that when the President used the Sussex case as a test, The Tribune continued to declare that the submarine issue was no cause for war.

An editorial from The Tribune was introduced and Ford counsel proceeded to read from it, "If we win in Germany, what do we win?"

"Yes, what do we win," interjected the witness.

"Blessed if we know"—continued the editorial.

"Yes, blessed if we know," broke in the witness again, "we don't know today."

"You stated," said Ford counsel, "that when the government finally decided on its position that you supported it and stopped argument against war with Germany. Do you consider that when the President had presented an ultimatum and broken off diplomatic relations that you were supporting him and the nation by continuing to tell the people that the President had no ground for war with Germany?"

"Yes, because the submarine issue was not a good ground for war."

"Well, when the President broadened the issue by telling the country that we must enter the war to make the world safe for democracy, did you argue for war on these broader grounds?"

"No, we did not."

Overlooked Ford's Offer.

"Did you know, Mr. Blake, that Mr. Ford was the first person in the United States to offer himself, his ability, his factories and all he had, to assist the government in the event of war—did you know that?"

"No, I did not know that."

"Your perusal of The Tribune did not give you that information about Mr. Ford?"

"No."

R. R. McCormick, president of The Tribune company, and one of the editors of the paper, was another witness. Mr. McCormick testified that The Standard Oil and International Harvester interests, in which Tribune stockholders have holdings, never in any way directed the policy of the paper towards Mexico. His testimony also touched the matter of salaries, which The Tribune cut off as soon as men entered the service of the nation in the great war, although it had continued salaries when its employees were called to the border. The fact that the army pay had been doubled, that married men were discharged from the guard and that conscription had been put in force, caused the paper to change its policies, Mr. McCormick stated.

E. G. Liebold, general secretary to Mr. Ford, and Edsel Ford, the president of the Ford Motor Company, were called to the witness stand by The Tribune late in the week. Mr. Liebold testified concerning a letter which he had written in response to a communication which sought to interest Mr. Ford in a device which would deal

ONE REASON WHY PRICES ARE HIGH

It's the Fault of the Paper Dollar.

When a man has but \$100 in bank and issues three 90-day notes for \$100 each, based on the bank deposit as security, the value of those notes soon falls very decidedly. In other words, the average creditor would feel that he ought to have two or even three such notes before he had paper sufficient to equal the value of that \$100 in gold that lies in the bank.

This is approximately what has happened with the world's currency. So much paper has been issued in the form of notes, credits, bonds and similar "promises to pay" that its value when compared with actual food and clothing and other necessities has fallen tremendously. We express this same idea the other way around by saying "prices have gone up."

There is no reason to expect rapid retirement of paper promises—war bonds the world over must run for some years yet to come, and private credits cannot be withdrawn soon. Therefore this cause of high prices will probably be with us for some time yet—several years, in fact.

In the case of farm crops, at least, there is another very good reason why prices are high. Many more mouths are to be fed than formerly and this condition also is likely to persist. War devastated fields cannot immediately regain their former productivity. The farmer seems to be secure in the assurance of good crop prices for a long time to come.

WELL-FED WHEAT PLANTS RESIST INSECT ATTACK

Mr. V. V. Clark, county agricultural agent of Marshall county, Indiana, has made some extended demonstrations on the use of commercial fertilizer combined with a good seedbed for wheat as a preventative measure against the attack of Hessian fly and joint worm. He considers the use of proper tillage and proper fertilizers the best method available for counteracting the attack of these wheat pests. Mr. Clark says that his observation is that the well-fed plant is more resistant to attacks by both insects and diseases. Mr. Clark recommends ammoniated fertilizers for use on wheat because it is desirable to have ammonia to force the growth of wheat so that it will be better able to withstand winter conditions.

WORLD RECORDS IN WHEAT GROWING.

The largest yield of wheat ever recorded was 117.2 bushels per acre. It was produced in 1895 in Island county, Washington, on an 18-acre field.

The largest yield of wheat over a period of years of which the world has any record is that of 36½ bushels per acre at the Rothamsted experiment station in England. This yield is the average for a period of 60 years. Ordinary unfertilized land in England does not do that well. In fact, the average yield of unfertilized land for the same period of years was only 12½ bushels. The extra 24 bushels was the result of an annual application of fertilizer containing nitrogen, phosphoric acid and potash.

TWO CHANCES TO INCREASE THE WHEAT CROP

Growers May Have Both Profits as Well as One.

Many wheat growers are overlooking two chances of increasing their wheat crop after it is planted and thereby getting larger acre yields and bigger profits. This extra yield and profit is secured by top-dressing the wheat early in the spring with available plantfood, preferably in the form of an ammoniated phosphate fertilizer. This is a fertilizer carrying ammonia and available phosphoric acid that gives the young wheat plants, weakened by the winter, a sturdy start and furnishes plantfood to make the extra gain. When barnyard manure is used it had best be applied as a thin, even covering or top-dressing early in the winter. Whenever possible use the manure spreader for this work, as hand dressing is not satisfactory because it leaves the manure lumpy and uneven.

Fertilizer applied early in the spring increases the crop yield in two ways, first, by making the stalks and heads already started grow larger and by increasing the tillering or stooling. Every extra "tiller" means an extra head. Only a few extra "tillers" to a plant means several more bushels to the acre. If the wheat is top-dressed late in the spring, that is after it has made a good start, it will not "tiller," hence the only chance to increase the yield is by lengthening stalks and heads, but by fertilizing early the chances of increasing yields are doubled.

For spring top-dressing, the broadcaster is better than the fertilizer drill. It covers the ground more rapidly and the inconvenience of keeping the drill disks or hoes out of the ground, or of removing them, is avoided. The ordinary fertilizer drills can, however, be satisfactorily used for top-dressing if care is taken to fasten up the hoes or disks away from the ground, or to remove them.

NO HALT IN 'Y' WELFARE WORK

Will Remain With the Soldiers Throughout Demobilization.

EFFORTS OFFICIALLY PRAISED.

Women's Labors for Doughboys Receive Special Mention.

ONE of the brightest pages in the history of the titanic struggle which terminated in the wreck of the German war machine is that upon which is inscribed the accomplishments of the welfare organizations of the United States. And among these several organizations, which labored to ameliorate war conditions among the fighting forces of America and her allies, none played as important and conspicuous a part and over such a wide stretch of time and as broad a territory as the Young Men's Christian Association.

The "Y" was "on the job" from the very beginning of hostilities in Europe, and it ever amplified its activities as the need for its assistance increased. It was in the mobilization camps, ready for service when the first United States troops were called to the colors. It welcomed the first contingent of American troops to reach the shores of Europe. It remained with the doughboys until the last shot was fired, it still is active wherever our soldiers or sailors are to be found today, and it will continue as a welfare agent among the nation's men at arms until the last of these is mustered out of service. It was in 1914, when war was declared, that the "Y" representatives in Europe began their war service by co-operating with the English authorities in mapping out a plan of welfare work among the soldiers and in the prison camps of the allies and also in Germany. And the work begun at that time has been continued without intermission, increasing demands for service usually being anticipated.

But the period for the complete demobilization of the American fighting forces is approaching, and rapidly, and as the time nears when the war activities of the Young Men's Christian Association will no longer be necessary the praise for its work and its accomplishments from those who occupied places of authority and in exceptional positions to observe actual conditions continues to be made public.

Thomas W. Gregory, formerly Attorney-General, who has just returned from France on a mission for the government, in a statement concerning the activities of the "Y," said:

"Recently I have had an opportunity to observe the work being done among the American soldiers abroad to insure their happiness and comfort. I have seen many of the men and women who are devoting their time to the welfare of the soldiers and what steps they are taking to assure their happiness and physical and moral welfare. I have been particularly impressed with the work American women are doing. Now that the incentive of battle is over, the doughboy wants to come home. Our women are doing their best to bring America to him. They attend to his creature comforts. They brighten him up with entertainments, and they dance with him in the 'Y' huts. They are with him in the leave areas where he goes for pleasure and rest. They provide his amusement."

"I left Paris on the morning of March 31st. We not only covered the immediate area of fighting between the German and allied lines, but we went behind both the German and the American lines at various points, observing conditions. We found the First American Army encamped as a general thing behind the old French lines, south of the devastated area, and in most instances rather comfortably situated. We found the 'Y' there. The Third Army was along the Rhine in German territory, and it was generally reported to me as also being comfortably housed. Here also the 'Y' was with them."

"I noted at many other points the huts of the Y. M. C. A. So far as my observation went they furnished the only real home atmosphere in this section of the country. I saw the boys' come into the huts about 5 and 6 o'clock, weary and bedraggled. They stood in long lines, and were handed hot coffee and chocolate without charge, and sometimes there also were sandwiches and light refreshments. At all of the huts I found girls, distinctly American, who were doing work of the finest kind. It was perfectly evident that they were enduring hardships. I saw numbers of them trudging through the mud and the ruins of these devastated villages and towns. They were neatly and attractively garbed. They were without exception cheerful in their demeanor, they seemed to be unusually popular with the boys, and yet it was apparent that they were doing the work under very distressing conditions. But these had not lessened their morale, and in so far as I could observe, the work in every instance was being well done. A few days after returning to America it gave me great pleasure to state to the officials of the War Department the splendid work the Y. M. C. A. was doing."

Raymond B. Fosdick, chairman of the Commission on Training Camp Activities, who has made a study of the welfare work done for our fighting men both here and abroad, in a report to the War Department made public recently, discussed the work of the six organizations which served with our army on the other side. The report said the Young Men's Christian Association, handling 58 per cent. of the war work budget and with 5,000 representatives in France, was by far the largest.

The work of 2,500 young women serving under the Y. M. C. A. with the troops in France "is beyond praise," Mr. Fosdick also stated, the girls being far better adapted to the task than the average man. Viewed broadly, he declared, "the Y. M. C. A. deserves the appreciation of the army and the continued support of the public."

"After eight months with the troops in France," Mr. Fosdick said, "I am convinced that the average woman worker attached to a hut is worth four or five men workers. Certainly her effect on the morale and spirit of the troops is extraordinary. An 'Honest to God American Girl,' as the soldiers call her, can do more to keep the men cheerful and create an atmosphere of home than any other factor."

NEW PRICES ON Delco-Light Products

"And There Wasn't the Slightest Smell From Dead Rats."

Write John Simpkins, farmer of Annandale, N. J.: "Rats were costing me hundreds yearly; tried dogs, ferrets, poison, could not get rid of them. Bought \$1.00 pkg. of RAT-SNAP (5 cakes). Used half, not a live rat since. Dead ones a plenty. I like RAT-SNAP because after killing rats it dries them up—leaves no smell." Three sizes, 25c, 50c, \$1.00. Sold and guaranteed by Sold by Metzgar Hardware Co.

To Be Friends Again.

One of the best ways of healing a quarrel is to ask a favor. If we attempt to do a kindness to a friend who is alienated, she will probably suspect our motive and reject it. But if we ask a service of her the barrier of misunderstanding will melt like snowflakes in the sun, and the way will be opened for us to be friends again.

EXPERTLY blended choice Turkish and choice Domestic tobaccos in Camel cigarettes eliminate bite and free them from any unpleasant cigarette aftertaste or unpleasant cigarette odor.

Camels win instant and permanent success with smokers because the blend brings out to the limit the refreshing flavor and delightful mel-

low-mildness of the tobaccos yet retaining the desirable "body." Camels are simply a revelation! You may smoke them without tiring your taste!

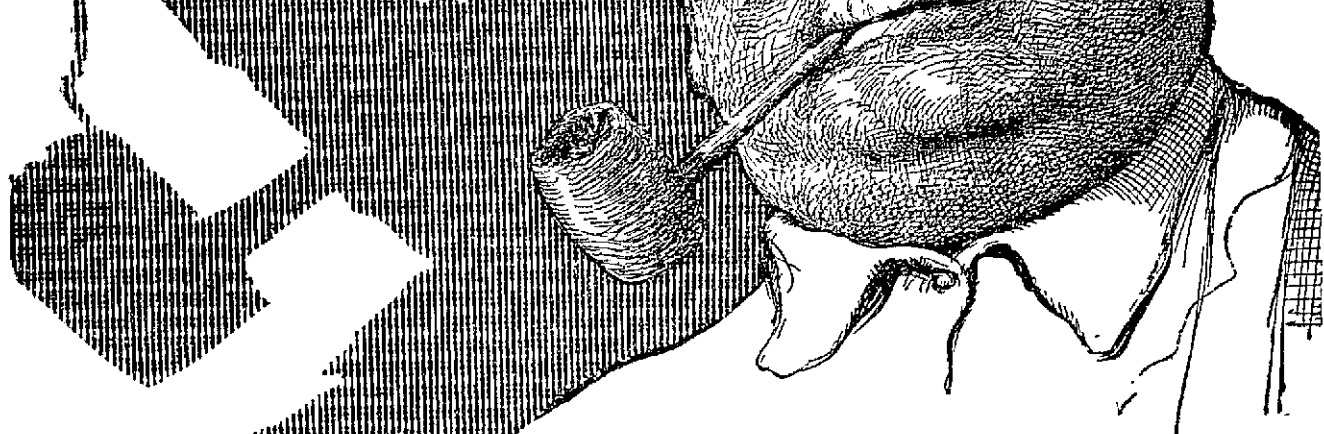

For your own satisfaction you must compare Camels with any cigarette in the world at any price. Then, you'll best realize their superior quality and the rare enjoyment they provide.

What you pay out your good money for is cigarette satisfaction—and, my, how you do get it in every puff of Camels!

R. J. REYNOLDS TOBACCO COMPANY, Winston-Salem, N. C.

PRINCE ALBERT

the national joy smoke

SAY, you'll have a streak of smokeluck that'll put pep-in-your-smokemotor, all right, if you'll ring-in with a jimmy pipe or cigarette papers and nail some Prince Albert for packing!

Just between ourselves, you never will wise-up to high-spot-smoke-joy until you can call a pipe by its first name, *then*, to hit the peak-of-pleasure you land square on that two-fisted-man-tobacco, Prince Albert!

Well, sir, you'll be so all-fired happy you'll want to get a photograph of yourself breezing up the pike with your smokethrottle wide open! *Talk about smoke-sport!*

Quality makes Prince Albert so

appealing all along the smoke line. Men who never before could smoke a pipe and men who've smoked pipes for years all testify to the delight it hands out! *P. A. can't bite or parch!* Both are cut out by our exclusive patented process!

Right now while the going's good you get out your old jimmy pipe or the papers and land on some P. A. for what ails your particular smokeappetite!

You buy Prince Albert everywhere tobacco is sold. Toppo red bags, tidy red tins, handsome pound and half pound tin humidors—and that classy, practical pound crystal glass humidor with sponge moistener top that keeps the tobacco in such perfect condition.

R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

Penn's Desk and Long's Sword.

A desk originally owned by William Penn and a sword carried by Major Long, United States engineers, while he was a member of the first official government survey of the Rocky Mountains were among the articles bequeathed in the will of the late William Foulke Johns of New York. Mr. Johns left the old desk to his widow, with the provision that on her death it is to go to Independence Hall, Philadelphia. The sword was given to the Smithsonian Institution.

Accounting for It.

Oldest Timber.

What is described as the oldest timber in the world which has been used by man is found in an ancient temple of Egypt. This timber is used in connection with stone work, which is known to be more than 4,000 years old. This wood—and the only wood employed in the construction of the temple—is in the form of ties which hold the end of one stone to another. The ties appear to be tamarisk, of which the ark was constructed.

SPROUL SIGNS ELECTION BILL

Non-Partisan Law Is Now Dead
Letter As It Affects Third
Class Cities In State

OTHER MEASURES SIGNED

Short Items of Interest Gathered at
the Various State Departments
Touching Affairs of the People
of the Commonwealth.

Harrisburg.—Non-partisan elections of mayors and councilmen in third class cities of Pennsylvania were made a thing of the past by Gov. William C. Sproul when he signed the Wilson bill repealing the non-partisan elective feature of the Clark act of 1913. The new order of things is effective at once, and on September 16 the 30 or more third class cities will nominate candidates on party tickets, as they did before the Clark act became operative.

The time for circulating petitions for such nominations is now here, and as soon as the governor signed the bill telegrams were sent to all county authorities and to officials of cities and of political committees notifying them of the change in the law to the old order of things.

Governor Sproul cleared up in three days' work nearly 100 of the 650 bills left with him by the Legislature. He will now take up appropriation bills, attention being given to the general appropriation bill which carries the funds for conduct of the state government and represents more than \$44,000,000. This will be signed soon, but it is probable that some reductions will be made in the items. Included in the bill are items of over \$1,000,000 each for the sinking fund and interest on the road bonds. The rest of the appropriation bills will be disposed of later. They comprise two-thirds of the bills on the governor's desk.

All election bills left by the Legislature were signed by the governor. Other bills signed included the transfer of the fire marshal's department to that of the state police, several bills relative to highways, including changes in routes, the mothers' pension bills, including a \$600,000 appropriation, the Woodruff teachers' salary measure and the act forbidding sale of state eggs as fresh, together with many others.

Foust's New Record.

Revenue of the State Dairy and Food Division, now the Bureau of Foods of the State Department of Agriculture, went over the half million-dollar mark for the first six months of this year for the first time. The great bulk of the income was for licenses for the sale of oleomargarine, which have broken all records. The total receipts for the half year were \$502,702.40 or more than twice as much as it costs to operate the bureau for two years.

Two Opinions Given.

Opinions have been given by the Attorney General's Department to the State Public School Employees' Retirement Fund Board that continuation school teachers whose salary is paid by a manufacturing company and clerks to county superintendents of schools paid by county commissioners are not eligible to membership in the State retirement system.

Thaw Extradition Refused.

Attorney General William I. Schaffer informed Assistant District Attorneys Johnstone and Kilroe of New York that the place to bring proceedings to have Harry K. Thaw returned to New York for trial on a charge of assault was in the Philadelphia court, where Thaw was adjudged insane. Mr. Schaffer will recommend to Governor Sproul that the requisition of the governor of New York for return to that State of Thaw be refused.

Potato Wart Checked.

State Department of Agriculture officials believe that they have halted the potato wart, which did so much damage in the lower anthracite field.

State Buys Road.

The State Highway Department has bought for \$24,000 the Clay and Hinkleton turnpike in Lancaster county, and it will soon be freed.

Brown Rot About.

State Agricultural officials have called attention to appearance of the fungus disease known as brown rot in many peach orchards.

More Colors Received.

The colors of the One Hundred and Eleventh Machine Gun Battalion have been received by Adjutant General Beary for deposit in the Capitol.

Greatest Road Work.

Bills for the construction of over one hundred miles of State highways were recently opened at the State Highway department, this being the largest offering of road work ever made by any State in the Union.

Tractor Bill Approved.

The Eyre bill, which restricts the use of tractors and traction engines on the State highways and bridges, has been approved by the governor, and limits the size and kind of cleats that may be used on the machines.

Does Backache Worry You?

Some Bedford People Have Learned How To Get Relief.

How many people suffer from an aching back?

How few know the cause?

If it hurts to stoop or lift—

If you suffer sudden, darting pains

If you are weak, lame and tired,

Suspect your kidneys.

Watch for nature's signal.

The first sign may be headache or dizziness.

Scanty, painful, or too frequent urination,

Nervousness or a constant, dead-tired feeling.

Avert the serious kidney diseases.

Treat the weakened kidneys with Doan's Kidney Pills.

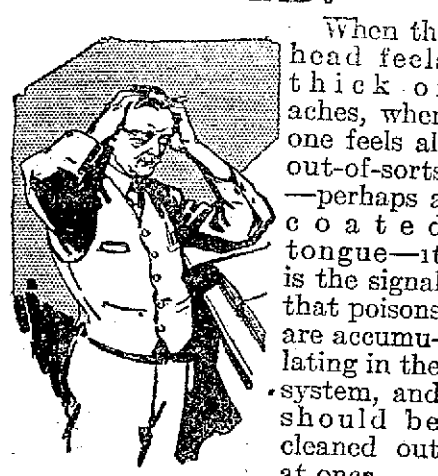

A remedy especially for sick kidneys.

Endorsed in Bedford by your friends and neighbors.

R. W. Grabill, Railroad Ave., Bedford says: "For some time I was troubled with my kidneys. There were bad pains in my back and on getting up in the morning I would ache all over. I had bad headaches, too. I started the use of Doan's Kidney Pills and soon all the headaches and pains in my back went away and I felt better in every way. On similar occasions since I have used Doan's and have found them to do the same good work."

Mr. Grabill had, Foster—Milburn Co., Mfrs., Buffalo N. Y.

MY HEAD!

When the head feels thick or aches, when one feels all out-of-sorts—perhaps a coated tongue—it is the signal that poisons are accumulating in the system, and should be cleaned out at once.

Auto-intoxication can be best ascribed to our own neglect or carelessness. When the organs fail in the discharge of their duties, the putrefactive germs set in and generate toxins—actual poisons, which fill one's own body.

Sleepiness after meals, flushing of the face, extreme lassitude, biliousness, dizziness, sick headache, acidity of the stomach, heartburn, offensive breath, anemia, loss of weight and muscular power, decrease of vitality or lowering of resistance to infectious diseases, disturbance of the eye, dyspepsia, indigestion, gastritis, many forms of catarrh, asthma, ear affections and allied ailments result from auto-intoxication or self-poisoning.

Take castor oil, or procure at the drug store, a pleasant vegetable laxative, called Dr. Pierce's Pleasant Pellets, composed of May-apple, aloes and jalap.

Printing in China.

The Chinese follow the primitive way of printing from engraved wooden blocks. The matter to be printed is first written by means of ink, upon paper which is pasted face downward upon a block of a pear or plum tree. After the paper becomes dry it is rubbed until an inverted impression of the characters is left. Then the blank spaces are cut away and the block is turned over to the printer, who works by hand. He takes care to ink the characters equally and to avoid tearing the impression.

It raises your cakes, biscuits and muffins just right—makes all home baking of that even texture and appetizing appearance sought for by all good cooks.

SAFE, GENTLE REMEDY BRINGS SURE RELIEF

For 200 years GOLD MEDAL Haarem Oil has enabled suffering humanity to withstand attacks of kidney, liver, bladder and stomach troubles and all diseases connected with the urinary organs and to build up and restore to health organs weakened by disease. These most important organs must be watched, because they filter and purify the blood; unless they do their work you are doomed.

Weariness, sleeplessness, nervousness, despondency, backache, stomach trouble, pains in the joints and lower abdomen, gravel, difficulty when urinating, rheumatism, sciatica and lumbago all warn you of trouble with your kidneys. GOLD MEDAL Haarem Oil Capsules are the remedy you need. Take three or four every day. The healing oil soaks into the cells and lining of the kidneys and drives out the poisons. New life and health will surely follow. When your normal vigor has been restored continue treatment for a while to keep yourself in condition and prevent a return of the disease.

Don't wait until you are incapable of fighting. Start taking GOLD MEDAL Haarem Oil Capsules today. Your druggist will cheerfully refund your money if you are not satisfied with results. But be sure to get the original imported GOLD MEDAL and accept no substitutes. In three sizes. Sealed packages. At all drug stores.

Heat ALL Your House THROUGH ONE REGISTER

Yes, it's just as possible in your home as it has been in fifty thousand others. You, too, may have every room comfortable with balmy healthful heat, reaching every corner by Nature's method of circulation—and all through only one register! It isn't necessary to clutter up your house with pipes, overheat your cellar and incur big bills—not when you can get the

The Original Patented Pipeless Furnace

It can be set up in a day, without inconvenience to you, and will make your home so comfortable in the severest winter weather you will be well repaid.

Your house will be uniformly warm; your cellar will be just right for the storage of fruits and vegetables. Your fuel bill will be less than with stoves that heat only a part of your house.

HERE ARE THE REASONS

The Caloric is the Original Patented Pipeless Furnace—the result of the study of competent engineers to solve the heating problem in the most satisfactory way. That they have succeeded is proved by the fact that the number of Calorics sold on an absolute guarantee of satisfaction is three times greater than any other pipeless furnace.

The cause of this satisfaction lies in the patented and exclusive principle that distinguishes the Caloric from all others. It is not a pipe furnace provided with an extra casing, but a complete revolution in furnace building designed exclusively for pipeless heating.

Come In And See Us

We will show you what these principles are, and you will then see what Caloric quality means, why it always succeeds and why imitations cannot accomplish the same results. Then you will be in no danger of buying an inferior article, with all its disappointment in later months. Get a copy of the book "Progress," which tells the fact about pipeless heating. If you can't come in, write for it.

H. Frank Gump & Son Inc.

JUST ONE GIRL RAN SMALLEST "Y" CANTEN

The smallest Y. M. C. A. canteen in the world is a portable one, which Miss Florence Sullivan picks up every morning and carries to the Columbia Club in

FLORENCE SULLIVAN.
Plymouth, England. It is just a little basket, this miniature canteen, but it holds many of the things that a real life-size but contains sweets and tobacco, a spoon of thread for those uniform buttons that keep pulling off, and a dozen other little comforts that are dear to the heart of a Yank.

ARMY CHAPLAIN COMBINED PREACHING AND BOXING

Boxing, as a side line to the ministry, is a professional combination that Earl A. Blackman has found works very well in his job as chaplain in the United States Army. Blackman was a parson before the war, in a Kansas church, and became a chaplain in 1917, attached to the 130th Field Artillery. But before that he had been a boxing instructor.

EARL A. BLACKMAN.
and now as an active champion of the Y. M. C. A.'s athletic program for the A. E. F. he has come to be known as the "Fighting Chaplain." Every now and then he demonstrates his enthusiasm for the sport by a little bout with a picked army man, and all the doughboys admit that he is as good in the ring as he is in the pulpit. Blackman encourages athletics and particularly boxing, because he holds that the sport develops a man mentally as well as physically. The "Fighting Chaplain" is extremely popular with the army men abroad, and has been of material assistance to the Y. M. C. A. in its organization of the great athletic program which it provides for the American army.

MILES OF FILM FOR SOLDIERS.

Paris, July 2.—More than 1,000 miles of film were used by the Y. M. C. A. during the month of April, in France and the Rhineland, to provide picture shows for audiences of more than 1,000,000 doughboys a week. More than 1,000 projection machines were required for giving these performances and over 1,500 employees were engaged in the work of the Cinema Department. The Y. M. C. A. commenced its cinema work with the A. E. F. just one year ago the last of April. Then 368 showings per week was a record, and these showings were given principally in the labor battalions. But the popularity of the shows and the demand for them was so great that the work had to be extended until now there are more than 4,332 showings per week. During this twelve months more than 90,000 shows were presented to audiences totaling more than 50,000,000 doughboys.

"Y" SHOWS NOVEL MOVIES.

Paris, July 1.—Being forced to travel back to American a bed patient does not mean the American soldier knows anything from enjoying a good movie on board ship. Even in the most serious cases, those who are forced to lie flat on their backs during the entire journey across the Atlantic are enthusiastic movie fans, their opportunity to see Charlie Chaplin, Doug Fairbanks and others being the result of an adjustable movie machine, which the Y. M. C. A. is using on transports to throw pictures on the ceilings of the sick-bays, or wards, where the worst cases are placed. The ceiling screen movie on shipboard came as the result of experiments that have proven successful in American hospitals in France, the pictures in these cases being thrown on the plain white ceiling without the use of a screen. The machines used are small, and are adjusted at an angle that makes a perfect picture show possible. The men in the sick-bays are said to be the most appreciative movie-audiences with which the "Y" has dealt in all its work in the A. E. F.

"Y" ACTIVITIES IN RUSSIA.

Soldiers of many distinct nations which form the armed forces of the Allies in Russia, are being served by the Y. M. C. A. there. These include Americans, Czechs, French, British, Polish, Russians, Italian, Serbian, Roumanian and Chinese soldiers. The "Y" now has twenty huts and thirty "rolling canteens" in Siberia.

Everything All Right.

Nellie was happily anticipating Santa Claus' visit. It was Christmas eve, and raining furiously. A friend happened in and said: "Santa Claus can't come tonight because it is raining." Nellie thought seriously a moment and said: "Oh, yes he can; he has his reindeers."

Nudges

Human nature seems to be pretty much the same everywhere except in lovely.

The Horse Doctor says when he gives the people of his community "hope" he expects pay for it.

The jail is now doing a good business. Several men from Broad Top who have always claimed they always do the right thing have got caught.

Daniel Marlow yesterday was raving about having his rights and from the run of his conversation it was conceded by his auditors that he wanted to overstep the line and take a calf which he had taken up as a stray and which the whole crowd knew belonged to the Widow of the Turkey Foot neighborhood.

It has now been developed that a lot of valuable time was wasted around the stove at the store last winter by members of the Shade Tree Club who laid big plans for bumper crops this summer. The past few weeks of hot weather has developed this fact. The club has increased its membership since June 31st by taking in Baltz Snyder, Elmer Williams, Thad Boor and Jack Pee. Lots of women want to join but the men want all the shade to themselves and won't admit them. It is said that Lucy Andrews and Mrs. John Layton and Mrs. Frank Smith have tried several times to be admitted but they were voted out every time.

Mrs. Jake Stayer, of Everett, Rt. 3 sent Jake to town yesterday for a number of household articles and he forgot about half of the list. He has not gone home yet, being afraid to go until he can think of them. In the meantime he is not having very much to say and seems most of the time to be in a deep study.

George Hann lost another dog yesterday. This leaves only ten. George says he will not recruit any more until there is a chance for the better as he does not care to sacrifice any more than he has now. His dog graveyard is fast filling up.

Persistence more often makes a fellow a bore than a success.

Mike Sampson has lately begun practicing mind control. Miss Petunia Becher says if it is his own mind he is trying to control he should not have much of a task as it is a weak sort of a thing. Mike quit going with Petunia a while back and began going with the Widow of the neighborhood.

Some people make their money go a long ways, others never let it go at all.

You can practice what you preach if you have a sufficient number of rehearsals.

Your experience will teach you at 50 to wish you knew half as much as you thought you did at 20.

A prohibition even can get drunk with power.

Love is getting to be a disease, so the victims should be quarantined. You can't turn your back to a friend and not expect to be talked about behind it.

Hose Sprung A Leak

Mrs. Ratto, of Wilmington, Del., had \$300 concealed in her stocking when it sprung a leak and the \$300 slipped out. The money was kicked about the streets for seven hours when a little girl picked it up and gave it to her father who returned it to the distracted woman. She felt like "darn" in her stocking. She got after the runner.

Forests of the Caucasus.

The forests of the Caucasus in Russia are estimated at 12,000,000 acres, chiefly in the Black Sea territory, which is at the rate of nearly 20 acres to each inhabitant. The forests of western Siberia have been scarcely explored, but they are stated to be 200,000,000 acres in extent, more than half lying in an absolute state of nature.

Not Really Sardines.

A large proportion of the so-called sardines taken along the Atlantic coast of this country and Canada are not true sardines but are the young of the herring and menhaden. They are prepared in about the same way as true European sardines, however, and it would puzzle some of the most experienced epicures to distinguish the spurious from the genuine.

Right Road to Happiness.

The un-fish are the happiest—those who work to make others happy, and forget themselves. The dissatisfied are those who are seeking happiness for themselves.

How To Control Insect Enemies Of The Garden

This booklet which is issued by the Bureau of Plant Industry contains directions for the control of most of the common insects and diseases of the home vegetable garden.

Become familiar with the insects and diseases known to occur in your locality on the crops you are growing. Equip yourself in advance with all necessary remedies and the means of applying them. Remember that the timely application of a remedy acts as an insurance against loss.

Readers of the GAZETTE may obtain a copy of the booklet free, by asking for F. B. 856, addressing a postal card to the Division of Publications, Department of Agriculture, Washington, D. C.

Salting And Fermenting Vegetables

Recent experiments by the Department of Agriculture have shown that a great many vegetables may be satisfactorily preserved by salting and fermenting and that this method deserves wider use in the home. To foster this method of preserving, the Department of Agriculture has issued a booklet called "Preservation of Vegetables by Salting and Fermenting."

In this country the only substances commonly prepared by fermentation are sauerkraut and salt pickles and in some regions salted beans. Many other vegetables however lend themselves very readily to this method of preservation. GAZETTE Readers may obtain a copy of this booklet free, by asking for F. B. 881, addressing their request to the Division of Publications, Department of Agriculture, Washington, D. C.

How To Make Good Bread

The Federal Government through the States Relations Service of the Department of Agriculture has issued a booklet on bread and home bread making.

The Booklet describes in simple terms the general principles on which bread making is based and suggests an easy standard method for making yeast-raised wheat bread in the household. It also indicates how this standard receipt may be modified to make different types of yeast raised bread, and gives a few other receipts for breads made from other cereals than wheat or raised by other means than yeast.

You may obtain a copy of this booklet free, by addressing a postal card to the Division of Publications, Department of Agriculture, Washington, D. C. and ask for F. B. 807.

Many on old sport is still protesting that \$50 a ticket for a three-round prize fight looks rather like profiteering.

The George Washington has enjoyed so much distinction that it will never go back into the ranks of ordinary steamships. Many tourists of the future will begin some of their most interesting sightseeing immediately after leaving the dock.

A three round prize fight leaves an impression that even the pugilists are inclined to give the public as little as possible for their money.

Fight Pays U. S. About \$100,000 In War Tax.

The Government's share of the Willard-Dempsey fight proceeds was about \$100,000, Internal Revenue Commissioner Roper announced.

Poper sent a representative to Toledo to see that the Federal tax of one cent for each ten cents collected in admissions was collected.

Navy Buys War Dirigible

The Navy Department will buy a dirigible of the rigid type from Great Britain preparatory to its plans of establishing a factory at near Cape May.

It is understood that the navy wants to begin operations in the development of dirigible ships as soon as possible.

The Navy proposes to spend \$2,500,000 for the British ship, but it is said that the Bureau of Construction and Repair will eventually be able to duplicate it for \$1,500,000.

Admiral W. S. Simms, who was in charge of our Naval operations in European waters, suggested to the Navy Department to give particular attention to this class of scout ship.

This summer's motorist may proceed without fear of gasolineless Sundays.

Lightning Calculation.

An eminent electrician has figured out the horsepower of a lightning flash. The amount of light given by a single lightning flash is sufficient to illuminate an area two miles square with an average illumination of one candle. To produce such an illumination, he estimates, the expenditure of 13,000 horse power for one second would be required.

Likes Hot Stuff.

The common green frog has been discovered to possess an insatiable greed for wasps. This extraordinary appetite does not seem to be in the least checked by an occasional sting. The protruding color of the frog, which sits motionless upon leaves, no doubt hides the most wary of insects into a sense of security.

LA FAYETTEVILLE

Miss Anna Klotz of Bakers Summit spent a few days last week with her aunt Mrs. D. B. Teeter.

Mrs. Elizabeth Klahr and granddaughter Elizabeth Fethers of Klahr spent Friday and Saturday with the formers sister, Mrs. Miles Claar.

How To Make Fruit Butters

Do you utilize your fruit culls? Fruits which are unfit for canning may be made into excellent fruit butters with but little effort. Get this booklet which is issued by the many receipts for fruit butters with directions for canning them. During the peach and plum canning season you will doubtless have many culls which may be utilized.

Readers of the GAZETTE may obtain a copy of this booklet free by asking for F. B. 900, addressing a postal card to the Division of Publications, Department of Agriculture, Washington, D. C.

A Drying Booklet Free
Drying offers many advantages over canning for preserving certain fruits and vegetables since it is simple, convenient, and an economical method of preserving, and the finished product requires less storage space. The Government booklet describes homemade driers and gives directions for the preparation, drying, and care of each of the more important fruits and vegetables.

Readers of the GAZETTE may obtain a copy of this booklet free, by asking for F. B. 984, addressing the Division of Publications, Department of Agriculture, Washington, D. C.

Rev. U. S. Wright, pastor of the M. E. Church is away on four weeks vacation.

How To Get Rid Of English Sparrows

The English sparrow which was introduced into this country in 1851 is little short of a public nuisance. It defiles private and public property, destroys fruit, grain and vegetable crops, fights and drives away useful native birds and replaces their songs with discordant sounds. The Bureau of Biological Survey has issued a booklet on the destruction of these unwelcome birds. Get this booklet and rid your locality of this pest.

GAZETTE readers may obtain a copy of this booklet free, by asking for F. B. 493, addressing their request to the Division of Publications, Department of Agriculture, Washington, D. C.

In Defense of Poetry.
Springtime wouldn't be springtime without its violet—autumn wouldn't be autumn without its vivid foliage. And the book of life wouldn't be complete without its poetry.—Christian Herald.
